

Biography: Trudith-Anne Ohki

As a long term sessional and currently the Introductory Psychology Coordinator (IPC) for the Department of Psychology I continue to have much to offer in the way of diversity of experience for the Board position of Sessional Member. If I am successful, this coming year would be my second term on the GMUFA board. I am very interested in sessional issues and because my IPC role is full-time I will have no problems with devoting time to the Board position with the support of my Chair. Both my roles support the function of the Department of Psychology by providing academic and administrative support for Introductory Psychology courses and by maintaining and updating the online systems used for delivery of materials and evaluations and supervision of a team of student teaching assistants. Finally, I have extensive committee experience at MacEwan University. I have continually sat as a part of many committees for the last 14 years.
